[2] A household that has at least one member of the household related to the householder by birth, marriage, or adoption is a "Family household." The householder is termed a "family householder." All persons living in family households are included in this total regardless of their relationship to the householder. Same-sex couples are included in the nonrelatives category.

[3] "Nonfamily households" consist of people living alone and households which do not have any members related to the householder. The householder is termed a "nonfamily householder."

[1] The race concept "alone or in combination" includes people who reported a single race alone (e.g., Asian) and people who reported that race in combination with one or more of the other race groups (i.e., White, Black or African American, American Indian and Alaska Native, Native Hawaiian and Other Pacific Islander, and Some Other Race). The "alone or in combination" concept, therefore, represents the maximum number of people who reported as that race group, either alone, or in combination with another race(s). The sum of the six individual race "alone or in combination" categories may add to more than the total population because people who reported more than one race are tallied in each race category.

	Elgin city, Illinois
Total races tallied for householders:	35,916
White alone or in combination with one or more other races	26,407
Black or African American alone or in combination with one or more other races	2,907
American Indian and Alaska Native alone or in combination with one or more other races	540
Asian alone or in combination with one or more other races	1,761
Native Hawaiian and Other Pacific Islander alone or in combination with one or more other races	33
Some Other Race alone or in combination with one or more other races	4,268

NOTE: The alone or in combination categories are tallies of *responses* rather than *respondents*. That is, the alone or in combination categories are not mutually exclusive. Individuals who reported two races were counted in two separate and distinct alone or in combination race categories, while those who reported three races were counted in three categories, and so on. For example, a respondent who indicated "White **and** Black or African American" was counted in the White alone or in combination category as well as in the Black or African American alone or in combination category. Consequently, the sum of all alone or in combination categories equals the number of races reported (i.e., responses), which exceeds the total number of householders.

NOTE: The alone or in combination categories are tallies of *responses* rather than *respondents*. That is, the alone or in combination categories are not mutually exclusive. Individuals who reported two races were counted in two separate and distinct alone or in combination race categories, while those who reported three races were counted in three categories, and so on. For example, a respondent who indicated "White **and** Black or African American" was counted in the White alone or in combination category as well as in the Black or African American alone or in combination category. Consequently, the sum of all alone or in combination categories equals the number of races reported (i.e., responses), which exceeds the total population.

NOTE 1: The numbers by detailed Pacific Islander groups do not add to the total population. This is because the detailed Pacific Islander groups are tallies of the number of Pacific Islander *responses* rather than the number of Pacific Islander *respondents*. Responses that include more than one race and/or Pacific Islander group are counted several times. For example, a respondent reporting "Samoan, Tongan, **and** Black or African American" would be included in the Samoan as well as the Tongan numbers. "Not specified" includes respondents who checked the Other Pacific Islander response category on the census questionnaire and did not write in a specific group or wrote in a generic term such as "Pacific Islander."

NOTE 1: The numbers by American Indian and Alaska Native tribal grouping do not add to the total population. This is because the American Indian and Alaska Native tribal groupings are tallies of the number of American Indian and Alaska Native *responses* rather than the number of American Indian and Alaska Native *respondents*. Responses that include multiple American Indian and Alaska Native tribes are counted several times. For example, a respondent reporting "Apache and Blackfeet" would be included in the Apache as well as Blackfeet numbers. "Not specified" includes respondents who checked the American Indian or Alaska Native response category on the census questionnaire and did not write in a specific group or wrote in a generic term such as "American Indian" or "Alaska Indian."

NOTE 1: The numbers by American Indian and Alaska Native tribal grouping do not add to the total population. This is because the American Indian and Alaska Native tribal groupings are tallies of the number of American Indian and Alaska Native *responses* rather than the number of American Indian and Alaska Native *respondents*. Responses that include more than one race and/or American Indian and Alaska Native tribal grouping are counted several times. For example, a respondent reporting "Apache, Blackfeet, **and** White" would be included in the Apache as well as Blackfeet numbers. "Not specified" includes respondents who checked the American Indian or Alaska Native response category on the census questionnaire and did not write in a specific group or wrote in a generic term such as "American Indian" or "Alaska Indian."
