FAX 847 / 931-6179

Dear Building or Business Owner:

The City of Elgin passed an ordinance in 2005 *requiring* all commercial structures within the City to install and maintain a lock box for use by the Elgin Fire Department in the event of an emergency at your facility. The only authorized lock box that is allowed and accessible by the Elgin Fire Department is the **SupraSafe Rapid Entry System** offered by **Kidde Safety**. No other brands or types of lock boxes are allowed.

Order forms are available through the Elgin Fire Department, 550 Summit Street, Elgin, IL 60120. It is your responsibility to choose the appropriate model, order the device from **Kidde Safety SupraSafe**, and install it at your facility.

The attached 'Waiver of Liability' must be completed and returned to the Elgin Fire Department. The Fire Department can notarize the waiver if it is hand delivered.

Taxes are to be applied to the order form depending on which county your facility is located.

All **SupraSafe lock boxes** are keyed specifically for the Elgin Fire Department, and therefore the Elgin Fire Department maintains the only key to access the lock box. Once you have installed the lock box, you must call the Elgin Fire Prevention Bureau to have the building keys locked inside the **SupraSafe**.

SupraSafe lock boxes must be installed at the door to the Sprinkler Room for the facility. If the facility does not have a sprinkler system, then the **SupraSafe** should be installed at the door that provides the nearest access to the Fire Alarm Control Panel (FACP). For buildings that have neither a fire sprinkler system nor a fire alarm system, please have the lock box installed near the front door. We are available to answer any additional questions you may have concerning the ordering or installation of your **SupraSafe**.

In the Interest of Life and Fire Safety

Rapid Entry System

Instant fire department access without damaging the door or building

The Rapid Entry System is designed to help fire departments and businesses work together to preserve lives and property. It eliminates the need for fire department officials to maintain and carry cumbersome key rings with hundreds of building keys.

Here's how the Rapid Entry System works:

1. The building owner purchases the Lock Box of his choice and mounts it securely near the entrance. Fire department officials lock the building keys in the Lock Box.
2. To ensure absolute security, Kidde has developed a flexible program for shipping Lock Boxes directly to building owners. Special security keys are supplied only to authorized fire department officials.
3. When a fire alarm sounds at night or on the weekend, the fire department has instant access to the building. Access is fast, easy and safe without the need for the building owner or tenant to drive to the site after hours.

Kidde — a name you can trust:

Safe and secure. Keys that open the Lock Boxes are provided exclusively by Kidde. Our SupraSafe 2 High Security units are UL certified antitheft devices. All SupraSafes are steel construction with locking systems designed to withstand attack. Optional tamper switches can be integrated with a building's alarm system.

The SupraSafe line offers a variety of sizes, styles and features. Building owners can custom-tailor a Rapid Entry System to meet their needs.

Toll-free product support. You have the resources of the world's largest lock box manufacturer and the backing of Kidde.

Help make it safer for the fire department to protect property and reduce injuries; avoid the expense of replacing a costly door or window due to unnecessary forced entry.

Costly damage of forced entry is eliminated when building keys are stored securely near entrances.

For more information call 800-654-9677 x 8365

Rapid Entry System Order Form

This form must be filled out completely or your order will be delayed.

- | | |
|--|---|
| 1. Orders must be prepaid. | 4. Submit order via: Fax: 800.547.2111 |
